MAYER'S PLANTS PRODUCE AND MAKE MONEY

Force in Digging and Packing Season on My Nursery. 44 Friends.

SHORT STATEMENTS

Every picture printed in this issue of my catalogue are photos taken from actual and true scenes of my Nursery.

I have fertilized by my method with stable manure all acreage planted to nursery stock, seeds and bulbs in spring 1924.

Every strawberry plant I grow in my nursery is grown in beds, rows fifty-six inches apart and plants set twenty-four inches apart in the rows.

Professor L. R. Taft, our state nursery inspector remarked at the time of inspecting my stock, "You sure have vigorous, fine stock this season."

Visitors from out of State and in State of Michigan made many fine remarks and especially on Champion and Progressive fall bearing varieties.

My high and dry sandy loam on which wild fruit grew abundantly, produces most vigorous, true to nature, white rooted stock grown. Saying nothing of Northern latitude.

For Day Old Chicks See Page 11.

My following explanations and descriptions are short, brief and true. Now read them slowly, page after page. They will be interesting to thousands and should interest you.

Hello Folks!
I am Baby Keith May-
er, now six years old.

This is a nice Glad-
ioli Blossom. You
can grow nice Gladi-
olis if you buy daddy's
bulbs. See page 13.

FOREWORD

FOLKS THERE is in every business a feeling of pride, or the business is not worth while. In the nursery business there must be ideals to which a nurseryman aspires, they must be clearly set forth and the nurseryman must work with consistent nature and conscientious effort to bring these ideals into realization. The nurseryman must have clearly in mind his responsibility. As a matter of business in my highest pride and ideals I am calling your attention to my nursery quotations and explanations for 1925. The growing season of 1924 was fine and full of bright and busy scenes throughout my nursery, which makes me think of the future as results of the present. In order to make my future much brighter, my present results in growing all my nursery stock was surely a success. I never have before grown such strong, vigorous plants and such nice bulbs and seeds. It is a true fact, that my true to nature, vigorous strain stock is leading in production and profits. With my yearly addition of plant acreage and almost every day reports from all parts of the United States concerning my well cultered nursery stock, I know I have a just right for a little good feeling of pride in my nursery business. For I can assure you stock such as would be very hard to equal in size, vigor and productiveness and also your entire satisfaction always. It is with pleasure that I give you the above explanation and the following true statements throughout my little catalogue. Thanking you in advance for any favor or order you may favor me with, I am always

Yours very truly,
M. MAYER, JR.,
Bohemian Nurseryman.

PROPAGATING STRAWBERRY PLANTS

Growing Strawberry plants is my greatest pleasure and specialty. A fact remains that there are not enough buyers of strawberry plants who understand the importance of vigorous quality plants, and as the growers learn what vigorous quality plants mean they pay any price asked. A vigorous young plant **must** establish themselves and grow as far apart as it is possible for proper cultivation. When strawberry plants are grown in rows too close, many plants become too thick in rows and a large per cent of these plants will not be properly developed in crown of plant and rooting system and will not blossom in fruiting season. I was amused last spring. I bought a few plants of a new variety, the plants arrived and were so small in crown and roots I sure was surprised. I thought of it no more, but I assure you this, plants may be called thoroughbreds, highbreds or any other breeds, but to my experiences it has always taken the large developed plants to give the highest yields of perfect developed berries. My above statements can be verified by your county agent or your State Agriculture College.

Progressive Variety, Mayer's Vigorous True Strain

MY NURSERY AND SALE OF MY STOCK

I am among the largest small fruit plant growers in Michigan. You will receive only this little business catalogue through which I sell all the stock that I grow. You will receive no follow up letters or more inducements. If you want the best stock grown, you are interested now. Many times I am asked how I can sell all the stock I grow with so small a catalogue. I answer. My stock sells itself after the first order is delivered, and my catalogue is good enough to get my customers first order. Through this, my little business catalogue is the only way my true strain, vigorous stock is offered you. Mayer's Plant Nursery has no salaried agents, no expensive literature and my prices are quoted the same to all and lowest on quality stock.

NUMBER OF PLANTS REQUIRED TO SET AN ACRE

Plants 18 inches by 3 feet.....	9,680
Plants 18 inches by 3 $\frac{3}{4}$ feet.....	8,297
Plants 24 inches by 3 $\frac{1}{2}$ feet.....	6,222
Plants 24 inches by 4 feet.....	5,445
Plants 30 inches by 3 $\frac{1}{2}$ feet.....	4,356

PLANTING AND PREPARING SOIL

The best results are obtained from early spring planting in most all states. Plants should be set in moist soil. When soil is too wet or too dry do not set plants. Heel them in the soil. Keep them slightly moistened and in a little shade. The plants should be set as soon as the soil can be properly prepared. A very thorough preparation of soil before planting will save many future disappointments. Also an aim should be to render rich soil, well drained soil, mellow soil as free from weeds as possible. There is no dread of weed or keeping soil in good condition if proper cultivation is given beds before and after planting. It is from strawberry beds which have been planted under good conditions that I receive wonderful reports of yields from my vigorous true strain plants.

NORTHERN GROWN NURSERY STOCK

I received many good testimonies about my dormant nursery stock. My stock can be planted in warmer climates than Northern Michigan, very late in season with good success. Northern grown stock when planted in warmer climate will resist fruit rot, insects and leaf blights, will make stronger growth and is more productive.

MAYER'S PLANTS PRODUCE AND MAKE MONEY

My Way of Spreading Manure on My Nursery

DIGGING AND PACKING

We begin digging and shipping in March. First shipments go south or to warmer states. Plants are carefully dug, nicely trimmed, counted and tied twenty-six in a bunch. Experienced packers place plants in properly dampened moss in boxes, crates, baskets and parcels, assuring you best possible delivery of plants. Generally season continues to about May 10th.

REFERENCE

Mayer's Plant Nursery of Merrill, Mich., is owned and operated by Michael Mayer, Jr., a man who has made a success in his undertaking, doing a very large Nursery business, which he built up through his own personal efforts. His nursery and himself personally are well known to us. He stands very high, as a man of ability and honesty. We do believe anyone wishing to buy nursery stock from him will place their interest in good hands. State Bank of Merrill, Mich., John Dufty, Cashier and Manager. Second National Bank, of Saginaw, Mich., R. T. Maynard, Vice-President. Post Office, Merrill, Mich., H. L. Barber, Postmaster.

GUARANTEE

I guarantee all stock to be No. 1 and true to name. I guarantee all deliveries to reach customers in good growing condition if shipped by express or parcel post. But I do not hold myself responsible for failure, after delivery of stock in good growing condition. My above guarantee surely should please you. In shipping season I have between forty and sixty men and women getting your plants, vines and seeds ready for shipment. About all are experienced laborers, and I have the highest confidence in them for doing their work one hundred per cent. I am here to please my customers always.

ORDERING

The demand for my stock each year has grown to unexpected limits. With the exception of two years, in the past sixteen years I have always been booked up on all stock grown in early season. There are many fruit growers who do not understand the value of an early placed order. When we receive your order early you are sure of varieties wanted, as we book up on each variety on estimated number grown; also your order will be shipped on date wanted. Please use page 15 as order sheet always, and be sure to write your name and address plainly. All prices, unless otherwise stated, are F. O. B. Merrill, Mich.

You can send remittance by post office money order, bank draft, express order, or your personal check. Make all remittances payable to Mayer's Plant Nursery or M. Mayer, Jr.

TESTIMONIALS

My customers write me hundreds of nice letters each year. Below are a few letters from my friend Mr. Smith of Muncie, Indiana. I received them only a short time ago. They pleased the Mayer family and should please you, for my stock always Pleases and gives Satisfaction. Mr. Smith's order was 154,700 fall bearing strawberry plants. We began shipments October 11, 1924.

Mayer's Plant Nursery, Merrill, Mich.—

Batesville, Ind., Oct. 17, 1924.

Delivered the plants yesterday at Sunman, Ind., and they were very nice Will deliver here tomorrow . One of the crates here was broken open, the top I guess, came off, but plants good. Thanking you for your promptness I remain
Yours truly, J. E. Smith.

Mayer's Plant Nursery, Merrill, Mich.,
Dear Sir:—

Muncie, Ind., Oct. 23, 1924.

Returned this evening, found wire. Plants received in good condition.
Please ship balance as directed. J. E. Smith

Received the 1500 express shipment of plants here today in good condition.
Yours truly, J. E. Smith.

Mayer's Plant Nursery, Merrill, Mich.,
Dear Sir:—

New Richmond, O., Oct. 27, 1924.

Received plants here in good condition. Thanking you for your prompt service, I remain

Yours truly, J. E. Smith

Mayer's Plant Nursery, Merrill, Mich.,

Manchester, O., Wed., Oct. 29, 1924.

Received plants here in good condition. Go to Portsmouth tonight.

Yours truly, J. E. Smith.

Mayer's Plant Nursery, Merrill, Mich..

Wheelersburg, O., Nov. 3, 1924.

Received plants here Saturday and at Portsmouth, Ohio Friday They were nice and in good condition. Go to Irontown, Ohio today. Best regards to all.
J. E. Smith.

Mayer's Plant Nursery, Merrill, Mich.,
Dear Sir:—

Irontown, O., Nov. 5, 1924.

Received the last of my plants at Russell, Ky. yesterday. They all arrived in good condition and I thank you for your services. Send me bill of balance and I will send you the money in a few days.

Yours truly, J. F. Smith.

Mayer's Plant Nursery, Merrill, Mich.,
Dear Sir:—

Muncie, Ind., Nov. 15, 1924.

You will find inclosed check for \$511.62, balance of my account. Thank you. I will need more strawberry plants for spring. Do not know just the number yet, but will let you know when the time comes. I delivered something like over 150,000 everbearing strawberry plants furnished by you. I have been handling strawberry plants for over thirty years and I can say cheerfully that I never had better service, better plants and prompter shipments rendered me.

Yours truly, J. E. Smith.

Folks, you know I have not the available space to print all your nice letters. I thank you for them. Write again.

Gibson Variety
Mayer's Vigorous True Strain

Premier Variety
Mayer's Vigorous True Strain

FALL BEARING VARIETIES

PROGRESSIVE (Per.)—Progressive is the first everbearing variety to prove in this country that everbearing strawberries were a real success, and possibly today surpassed only by the new Champion variety. Progressive variety today brings fruit in summer until late fall to millions of American homes. Progressive produces good crops of delicious berries. A full crop comes same season plants are set. Berries are beautiful dark red and mild in flavor, a very fine canning and eating berry. Plants and fruits resembles Champion. Progressive is our old favorite everbear as is Senator Dunlap, our old favorite June bearer. I have a very large stock of Progressive plants (heavy crowns, white roots) and if you buy Progressive variety from me it will be a profitable investment for you.

CHAMPION (Per.)—One of the newer kinds, but so great has been its value that it is the most popular variety of everbearing strawberry known today. It is now unquestionably stands at the head of any other variety of everbearer. Unless you have already grown and fruited Champion you never have experienced strawberry satisfaction. If you were in my position to know the increasing call for Champion plants you would realize as I do how successful throughout the country this variety has proven. Because of the increasing demand for my genuine Champion plants I advise that you give me your order now.

SPRING VARIETIES

SENATOR DUNLAP (Per.)—I have often given a long description on Senator Dunlap variety, but only with satisfaction and pride. Senator Dunlap variety is deserving of very good words. Today my vigorous true strain Senator Dunlap variety is more productive than any other strain grown. I have these reports from my customers. I sell more plants of Senator Dunlap variety than any other five leading varieties. Senator Dunlap variety is making money for fruit growers today. It is a very heavy bearer of large sized, evenly shaped berries and very dark red in color. They always sell at the highest market price. Plants are vigorous growers, my strain having large crowns and roots from six to eleven inches long. If you have never grown my strain of Senator Dunlap variety, order now and I assure you satisfaction and a surprise at fruiting time.

DR. BURRILL (Per.)—Large Commercial growers are growing Dr. Burrill today and it is the variety you should include in your order. It has strong, vigorous plants with long, heavy root system, which makes it a resister of drouth. Being a prolific runner maker, it is well adapted for any system of strawberry growing. I have some statements from my customers saying that Dr. Burrill at fruiting time plants are simply a mass of blossoms and fruit. Berries are large and beautiful, deep red color to the very center of the berry. Berries are a delicious flavor. Dr. Burrill thrives in all soils and climates.

WARFIELD (Imp.)—Warfield is generally conceded to be productive, having proven so under severe test. A berry similar to Dunlap in every respect, except that that it is pistillate. The berries are deep red, very firm and adapted for canning and shipping. As a rule the plants are not quite as large as the Dunlap, and I do not believe the berries average as large.

KELLOG'S PREMIER (Per.)—My small crop of plants of this variety and the enormous demand for plants is sufficient reason why you should place your order early. Kellog's Premier variety is in a class by itself. It produces a large crop of uniform berries, deep red and of the highest quality possible, which has made this variety famous with large and small growers everywhere. As pollitizer it is strong and the plants grow large with heavy rooting system. Beds as grown in my nursery are very beautiful.

AMANDA (Per.)—Many of my customers in the past years have been asking for Amanda variety, and I am glad to be able to offer my customers true Amanda variety. This valuable old variety had many friends a few years ago, and still has in the southwest.

GIBSON (Per.)—Gibson variety is greater each season, and if you wish my strain in this wonderful variety, place your order early. A sure wonderful strawberry and a good profitable variety. I make this strong statement, but it is true. Owing to its wonderful productiveness it continues fruiting medium early to very late. Gibson is a very strong grower. My strain, with roots from eight to twelve inches long, and the quantity of fruit it produces is unbelievable. Berries are large, beautiful dark red, which add greatly to its beauty and market value. Flavor is as good as can be found in any strawberry. Gibson berries sell themselves on all markets.

POCOMOKE (Per.)—Good variety. Profitable for its enormous productiveness and also for their beauty. Plants are strong, robust growers, very vigorous and adaptable to all soils. Berries are large and very red. I assure you satisfaction in the Pocomoke variety.

HOWARD NO. 17 (Per.)—The blossoms are large and have plenty of pollen. It is among the earliest of the mid-season varieties to ripen. Color is a rich red with a fine gloss. There is no berry of finer quality. The berry that is a "business berry." The Howard No. 17 has all good qualities with heavy production.

(Continued on Page 10)

COOPER (Per.)—Cooper is an extra large, if not the largest, strawberry grown. Is remarkable for its strong and decided upright habits. This is a valuable feature, it means money to have berries always free from sand. The leaves are large in size, resistant to insects. The long root system insures plenty of food. Cooper begins to ripen its fruit medium early along with Dr. Burrill and Gibson varieties.

EATON (Per.)—The firm berry, and no longer is it looked upon with doubt as an untried experiment. Eaton is among the heavy yielding varieties. All of its berries are large in size and dark red in color. Very perfect in shape to the last. It is a perfect strawberry in every way. Place your order early.

MAGIC GEM (Per.)—Magic Gem is a new variety that became very popular as an extra fine medium to late berry. Very large, firm, evenly shaped berries of good quality. Magic Gem is a dark red berry and a dark green calyx—it makes an appearance on any market—attracts attention and brings high prices to the grower.

MICHEL'S EARLY (Per.)—Many of my customers who grow Michels Early variety for early berries in many states report my strain as the best possible early variety. It is naturally adapted to light soils. Berries are light red through, and I have heard old people say the flavor of Michels Early filled the want as wild strawberries.

PARSON'S BEAUTY (Per.)—Largely planted by commercial growers on account of its vigor and productiveness. One that may be depended upon to produce a large crop of fruit. The plants are splendid growers on any soil, and without a sign of any disease. The fruit is large, conical, uniform shape, dark red.

GANDY (Per.)—A standard late variety. Plants are vigorous and productive, do well on low, wet soil as well as on high and dry soil. Berries are dark red and very large, ripening very late. Flavor is good.

STEVENS LATE CHAMPIONS (Per.)—True nature's vigor, my strain, you make no mistake in planting Stevens Late Champion. A variety largely grown in all states. The plants are very vigorous and do well in most soils. Berries may be left on vines without picking for many days; fruit is large, good color and firm. They stand longer shipments than most varieties.

AROMA (Per.)—Berries very large, late and produced in great abundance. A very popular variety with growers and consumers. Plants grown my way in northern Michigan produce enormous crops of fruit in southern and western states.

BRANDYWINE (Per.)—It is a great favorite with many growers. The fruit is deep, dark red, very large and attractive; a good shipper and market variety.

CHARLES I (Per.)—Is one of the first berries on the market. It is a profitable variety to grow. It has become one of the leading extra early varieties. Charles I Produces a big crop of large, evenly shaped, well colored berries that are particularly adapted for markets. Its long heavy roots enable Charles I to go through dry summers and produce big crops. You are assured of a wide row of healthy plants. Charles I is a variety bearing good crops when planted alone.

TRANSPORTATION

At the reasonable prices my vigorous true strain stock is offered you it will greatly offset transportation charges on your order. My plants are shipped to about every state in the United States, to many public institutions, and some foreign countries. I will give you express charges if you will advise number of plants and varieties wanted.

Large Fields of Plants on My Nursery. Mayer's Vigorous True Strain

STATE DEPARTMENT OF AGRICULTURE

Certificate of Nursery Inspection

No. 3120

This is to Certify, that I have examined the nursery stock of Michael Mayer, Jr., Merrill, Michigan, and find it apparently free from dangerous insects and dangerously contagious tree and plant diseases.

This certificate to be void after July 31, 1925.

BUREAU OF FOODS AND STANDARDS,

L. R. Taft, Chief Horticulturist.

Lansing, Mich., September 16th, 1924.

DAY OLD CHICKS

I am listing day old chicks for you this season. I have a friend who has a mammoth hatchery and with it has a life experience of selecting eggs and hatching day old chicks. His business has always interested me, for he is a man of business ability and good principles. He honestly knows his hatchery and selection of stock eggs from A to Z. He has built up on high egg production, size and vigor, of the following four varieties: Barred Plymouth Rock, S. C. Rhode Island Reds, White Wyandotte and S. C. White Leghorns. His entire business is built up on the four best known varieties. All the breeding flocks for eggs are country grown. At the proper times all flocks are graded by expert poultry breeders and with the best possible assistance of county agent as selector of breeding flocks. We know there are individual hens with a large egg record, but can this good old hen along with a few of her ancestors, lay enough eggs to run a mammoth hatchery and perhaps many of them throughout this country through a five or six months hatching season—NO—It takes many large flocks of breeding stock to lay enough eggs to run a large hatchery. The strain of chicks I am offering you will have egg records much above the average chicks on the market today, and I assure you are free from diseases. Rocks, Reds, Leghorns and Wyandottes are the four leading varieties and my honest desire is for you to buy your chicks from me and get large, strong, bright, fluffy chicks, which will be big money makers for you. All chicks are delivered to you by Parcel Post, prepaid and guaranteed 100 per cent live delivery. Should you wish more than 1,000 chicks write for low price. I assure you entire satisfaction. Do not delay in placing your order early. If prices advance, you get them at prices ordered. If prices decline, I will advise you and you can either have more chicks or money to the amount of lower prices. Shipping season begins March 1, 1925.

DAY OLD CHICKS PRICES

Barred Plymouth Rocks, S. C. Rhode Island Reds and White Wyandottes—
 25, \$5.50 50, \$10.50 100, \$20.00 500, \$95.00 1,000, \$180.00, prepaid.
 S. C. White Leghorns—25, \$4.50 50, \$8.50 100, \$17.00 500, \$80.00
 1,000, \$150.00, prepaid.

Large Fields of Plants on My Nursery . Mayer's Vigorous True Strain

BLACKBERRIES

ELDORADO—One of the finest blackberries grown. It is hardy and very productive. Has the indorsement of all agricultural departments. Canes are strong, berries are large and jet black, borne in large clusters. A very profitable variety.

BLACKBERRIES No. 1 PLANTS

ELDORADO—25 for \$1.50; 100 for \$4.00; 500 for \$16.00; 1,000 for \$30.00.

RASPBERRIES

CUMBERLAND BLACK—Has always a heavy crop of fruit. Berries are very large and fine quality and is a favorite variety, always selling at the highest market price.

CUTHBERT RED—One of the very best market and canning raspberries. Berries are large, rich and firm. Cuthbert variety is not surpassed by any red raspberry.

RASPBERRIES No. 1 PLANTS

CUMBERLAND Black Raspberry—25 for 75c; 100 for \$2.50; 500 for \$12.00; 1,000 for \$23.00.

CUTHBERT Red Raspberry—25 for \$1.50; 100 for \$4.00; 500 for \$16.00; 1,000 for \$30.00.

GRAPE VINES

CONCORD—The most delicious grape of all the old varieties in America. It adapts itself to all varying conditions and is grown in every grape growing section in this country. Berries are large, flesh is juicy, sweet and tender, with best grape flavor. A reliable and profitable variety.

GRAPES No. 1 VINES

CONCORD—25 for \$1.75; 100 for \$5.00; 500 for \$20.00; 1,000 for \$35.00.

Large Field of Gladiolus
Grown for Bulbs Only.
Scene on My Nursery.

GLADIOLUS

Culture of gladioli bulbs is work, wait and win. This brief article is written for two classes of flower lovers, those who have and those who have not grown Gladiolus. Those who have never grown this beautiful flower, have a surprise in store for them. Those who have grown it know what care, patience and skill devoted to improvement of this flower has done. Gladiolus of today is greatly superior to that of the past years. Descriptions of the following leading varieties are brief, but each and every variety will please you. I have improved these varieties and have grown this season, a large stock of fine bulbs. Prices on all varieties are prepaid.

GLADIOLUS No. 1 BULBS

AMERICA—A large, soft shell pink, very beautiful. A good one. Price—6 for 25c; 12 for 40c; 25 for 75c; 100 for \$2.00; 1,000 for \$15.00, prepaid.

MRS. FRANK PENDELTON—Bright rose pink. No grander variety. Price—6 for 70c; 12 for \$1.10; 25 for \$2.00; 100 for \$7.00; 1,000 for \$65.00, prepaid.

MRS. W. E. FRYER—Orange scarlet, large, wide open blossom. Price—6 for 25c; 12 for 40c; 25 for 75c; 100 for \$2.00; 1,000 for \$15.00, prepaid.

HALLEY—Salmon pink with large blossom. Price—6 for 40c; 12 for 70c; 25 for \$1.25; 100 for \$4.00; 1,000 for \$30.00, prepaid.

ROGE TORCH—White, shelled pink and cream. Price—6 for 25c; 12 for 40c; 25 for 75c; 100 for \$2.00; 1,000 for \$15.00, prepaid.

PANAMA—Several shades darker than America. Price—6 for 40c; 12 for \$1.25; 100 for \$4.00; 1,000 for \$30.00, prepaid.

CRACKERJACK—A rich, dark, velvet red, a great one. Price—6 for 40c; 12 for 70c; 25 for \$1.25; 100 for \$4.00; 1,000 for \$30.00, prepaid.

HELEN FRANKLIN—New white, very best. Price—6 for 50c; 12 for 85c; 25 for \$1.60; 100 for \$6.50; 1,000 for \$60.00, prepaid.

MRS. LEE—Rose pink with cream throat. Price—6 for 25c; 12 for 40c; 25 for 75c; 100 for \$1.75; 1,000 for \$12.00, prepaid.

The above prices on all varieties of gladiolus are for No. 1 bulbs from one to three inches in size. They will send out very strong spikes and large blossoms.

PRICE LIST FOR 1925

All below prices are for plants packed and delivered to express office or post-office F. O. B. at Merrill, Michigan. Express shipments are most satisfactory. If you wish parcel post shipments, figure exact charges on below schedule and remit with order.

Schedule of additional Remittances for Parcel Post Shipments

Add to your order for every

100 plants purchased in...	1st & 2d	3d	4th	5th	6th	7th	8th
	Zone	Zone	Zone	Zone	Zone	Zone	Zone
Strawberry Plants	\$0.10	\$0.18	\$0.22	\$0.30	\$0.36	\$0.46	\$0.55

Help me to help your friends. If you have friends whom you think my catalogue would interest, write their names and addresses on page 16. I have reserved this space for your friends addresses. Your favor will surly be appreciated, and you are helping me to help your friends. If you are not placing order, send me addresses just the same and I will send you a new stamp.

PANSY

Beds in
beautiful blossom. A
Scene on my Nurs-
ery.

I have grown a block of pansies which I know are the cream of all pansies. I am offering the seed to you in a mixture, which I know when grown, are the most pleasing. My varieties represents the best from the most noted pansy breeders. The flowers are perfect shades and well rounded, borne on strong, stiff stems, the petals thick and velvety and semi-double at the edges. The plants are robust and very healthy, blooming most profusely in most every imaginable color, striped, marbled, gold-veined, etc. In size of flowers and arrangement of colors there is nothing that will surpass my mixture. If you love pansies or grow pansies for profit it will pay you to try my pansy seed. Price per package of 200 seeds 25c. Ounce \$7.00, Postpaid.

ASTER

Beds in
beautiful blossom. A
scene on my nurs-
ery.

In beauty asters rank next to peonies and roses; their blooms are large and heavy and most brilliantly colored. Once you try them you will grow them every year for their beauty and because they are about the easiest flowers to raise. They make a grand cut flower and are a highly paying crop for that purpose. They are extraordinary showy when planted in masses and no flower will show off to better advantage than the aster in front of shrubbery or to fill vacancies in the hardy border. They will stand more cold than cabbage and can be sown or set out quite early. If sown as late as June the first, they will give a good fall bloom, even in the North. My old customers know my strain and to my new friends I must say you cannot buy better seed for vigor and large double blossoms through and through. Four beautiful colors mixed. Price per package of 200 seeds is 25c, postpaid.

REMARKS

I want to ask you again to look over each page. The low price in my catalogue on my true to nature, vigorous quality nursery stock set a new mark for Mayer's Plant Nursery. It carries further my policy of progressiveness of leadership that during the last year brought me hundreds of new customers.

WRITE YOUR FRIENDS ADDRESSES BELOW. THANKS
